

Technical Data Sheet

PRINCIPAL USES

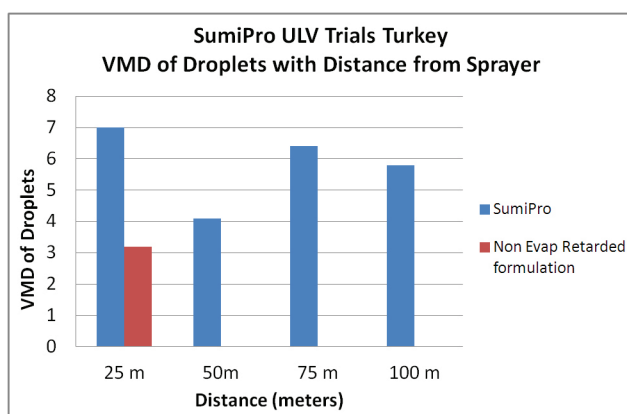

SumiPro™ is a unique water based, water dilutable space spray formulation.

KEY FEATURES:

- Uses Advanced Evaporation Retardation (AER) technology to maintain droplet size and efficacy
- Contains Metofluthrin – a novel highly volatile and effective knockdown agent that causes insect flight activation and enhances insecticide pickup and efficacy
- The highly active insecticide Gokilaht-S is combined with the synergist piperonyl butoxide that blocks metabolic resistance mechanisms giving excellent performance against hard to kill insects
- Broad spectrum of activity against flying insect pests
- Can be applied by aerial or vehicle mounted ULV equipment
- In vehicle mounted field trials in Turkey using a Micron AU 9110 ULV sprayer excellent performance was obtained up to 100 m from the sprayer
